Management Development Programme on

Project Management

September 8-9, 2011, FSM Campus, New Delhi

Introduction

The buoyant industry growth and laudable performance of major private and corporate giants has brought upswing in the Indian Economy. Today all prominent business houses, public sector enterprises, state and central Govt. undertakings and selected FORTUNE-500 companies as part of expansion are making massive investments in India through mid and large value joint-venture projects to create best of the infrastructural and state-of-the-art facilities. India has been identified as Hub for technology and back office operations by many large domestic and international MNCs for their Software Development and BPO operations.

Construction of All India Super-Corridor Highways (Quadrilateral), Delhi Rail-Metro, Up-gradation of International Airports, Several BPO (Call Centers) set-ups, E-Governance IT projects and now Commonwealth Games project are few examples of our prestigious and large value projects. Computer-based Project Management, Cost-Monitoring and Customized IT Software Development for various PM functional areas are being implemented in each one of them. It is a fact that no such projects can efficiently and effectively be executed without using on-line, real time and latest IT, Telecom and eCRM related tools and technologies for their completion within time, cost and resource constraints.

This 2-day programmed is specifically designed to appraise the participants about these techniques, tools, technologies associated with computer-based Project Management Systems.

Objectives

To acquaint the participating Project Management professionals at all levels with latest IT and Telecom related tools and Technologies like Web and Satellite-based Project Management, Applications Software Development, Integrated and On-Line Performance Monitoring & Cost Control Systems, Simulation and Network Applications, Data Security, Risk management and Project Crashing, Resource Optimization and Disaster Recovery applications.

Contents

The programme has been designed after detailed discussions and interaction with very senior and experienced Project Management, IT and Telecom, Construction Management, Banks and Insurance Management professionals and will cover various facets of Project Management and IT & Telecom applications as applicable in effective implementation of projects of varied nature.
